Scolmore®
G R O U P

The Scolmore Group Companies

Since our incorporation in 1989 we have become a significant force in the electrical accessory market. We're proud to be a British based, family-run business, with an excellent track record of listening to what our customers need and providing the right solution every time.

CLICK® ScolmoreGROUP

The home of wiring accessories...

Click Scolmore® is one of the UK's leading manufacturers of electrical accessories. The company is proud to be a British-based, family-run business with an international reputation for quality, innovation and exemplary customer service.

CLICK® Litehouse

Wiring accessories & lighting Ireland...

Click® Litehouse is a joint venture operation between Litehouse Accessories Ltd and Scolmore® International Ltd.

Scolmore® DUBAI

Wiring accessories & lighting Dubai...

Following six years of successful trading in the Middle East, Scolmore® Group opened a head office and warehouse facility in Dubai. Scolmore International Electrical Trading (Scolmore® Dubai) is located in the heart of Dubai in the Business Bay area.

OVIA® ScolmoreGROUP

Lighting solutions...

Already synonymous with superior performance and innovation following eight years of success as a leading name in the lighting industry, the Ovia® brand of lighting solutions has been further developed to meet the growing opportunities that the transformed lighting industry offers.

ESP® ScolmoreGROUP

Fire, Security & Emergency Products...

ESP® (Elite Security Products) Ltd is a market-leading supplier of a comprehensive range of electronic security and fire protection products.

ESPi® ScolmoreGROUP

Fire, Security & Emergency Products Ireland...

ESPI® (Elite Security Products Ireland) Ltd is a market-leading supplier of a comprehensive range of electronic security and fire protection products.

OVIA® ScolmoreGROUP

Lighting solutions for Ireland

Already synonymous with superior performance and innovation following eight years of success as a leading name in the lighting industry, the Ovia® brand of lighting solutions has been further developed to meet the growing opportunities that the transformed lighting industry offers.

UNICRIMP® ScolmoreGROUP

A comprehensive range of cable accessories...

Established as a new business by the Scolmore® Group in 2015, Unicrimp® brings to the electrical contracting industry a comprehensive range of cable accessory products.

SANGAMO

Time switches & heating controls...

Founded in 1921 and proudly manufactured in the UK, Sangamo is recognised as one of the world's leading design and manufacturers of a wide range of electrical measuring and control equipment.

The Home Of Wiring Accessories...

Click Scolmore®

—

Click Scolmore® is one of the UK's leading manufacturers of electrical accessories. The company is proud to be a British-based, family-run business with an international reputation for quality, innovation and exemplary customer service.

From our head office in the Midlands, we design, develop and manufacture an ever expanding product range for distribution throughout the UK and worldwide.

The Click® Wiring Accessories range remains the number one choice for electricians and contractors who value the flexibility of the modular based range, as well as the one-stop solution that the comprehensive offer allows.

Our online ordering service is supported by automated order picking and processing procedures which enables us to offer service levels we believe are unprecedented in the industry.

The company is committed to harnessing the very latest technologies and developing superior-performing, competitively-priced products which allow installation projects to be completed quickly and easily.

Mode® Made Easy

A stylish, contemporary and flexible range
of smooth profile wiring accessories

—

The smooth, modern lines of the
Mode® accessory plate will fit easily into
traditional and contemporary designs
alike. Mode® accessories provide
flexibility with a comprehensive selection
of products ranging from a standard
light switch and socket outlet through
to more specialised products dealing

with the very latest developments in
entertainment media interfaces.

We've shown just a sample of the
Mode® range. To see the full range
or for more details, please log onto
www.scolmore.com and register for
your free wiring accessories catalogue,
or download the Mode® section.

www.scolmore.com   Email: contractor@scolmore.com

Easy Installation...

with earth terminals at the top
of the product.
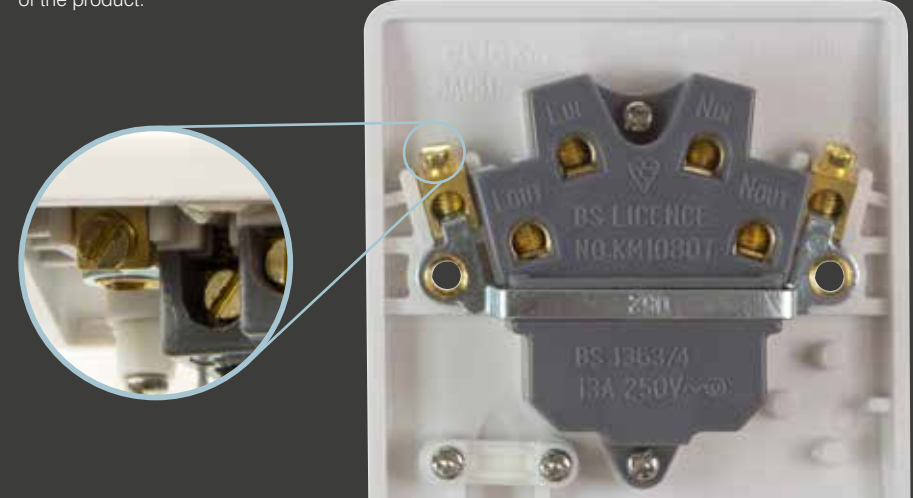

Interchangeable Modules

Mode® accessories have been designed
with the electrician in mind, by designing our
products with earth terminals at the top of the
product for easy installation.

Mode® accessories have been conceived and
developed as a high quality, flexible & modern
solution to virtually any domestic wiring requirement.

Simple, single screw fixing of modules offer
the simplest possible means of installing and
replacing modules.

The modular design of Mode® allows designers
and installers unprecedented flexibility in
creating dedicated wiring solutions to deal
specifically with actual wiring needs.

Antiviral & Antibacterial Certified

Mode® wiring accessories are manufactured
using Urea Formaldehyde, which has similar
inherent properties to antimicrobial additives
that inhibit the growth of infectious diseases.
All products independently tested achieved a
99.99% kill off rate across all four types of the
strains of bacteria - MRSA, E-Coli, Salmonella,
Klebsiella Pneumoniae and enveloped viruses.

1 and 2 gang switched sockets with USB

—

Eliminate the need for bulky chargers and free up your plug sockets with 1 and 2 gang switched socket with integrated USB! Our 1 and 2 gang switched sockets with dual USB outlets are available in 98 plate designs and finishes within the Click® brands. This provides flexibility for use in various locations; i.e. lounges, kitchens, bedrooms and offices.

Mode®, Polar™, Deco® and Deco Plus® require 25mm back boxes.
1 and 2 gang Define® and Definity™ require 35mm back boxes, while our Metal Clad range come supplied with 40mm back boxes.

USB Output 5 volt 2 amps

Suitable for most tablets, smart phones, cameras and other USB devices, all of which can still be used whilst charging! Twice as fast charging - Charge two devices simultaneously without fear of fluctuations within the power supply interfering! The load isn't split across both ports on our USB sockets, so you are guaranteed optimum charge every time!

Safety

Tested and complies with UK safety and EMC requirements and is in-line with EU legislation. The USB socket ranges also benefit from short circuit protection, so should there be a short on the output the power supply will shut down and reset after the short circuit has been removed.

Twin Earth Terminals

For a simple connection of the earth conductor.

polar™

CLICK®
ScolmoreGROUP
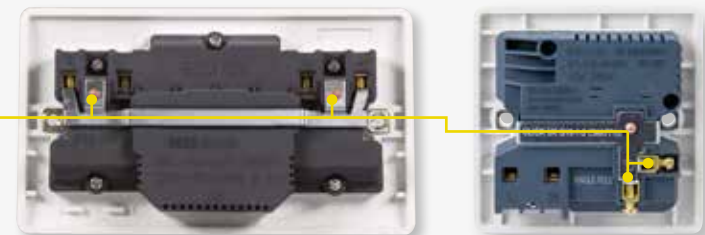

Ease of installation is hard-wired into our thinking

The Polar™ range of domestic electrical accessories has been developed as a distinctly different range to the traditional Click® accessory range manufactured by Scolmore® International Ltd. The Polar™ range was born out of a desire to offer a bright white wiring accessory product. Colour choice with wiring accessories is no different to colour choice of wallpaper, paints or other internal decorations. Installers have very definite views on which tone or shade of white is right for a particular installation.

GRIDPRO®

CLICK® ScolmoreGROUP
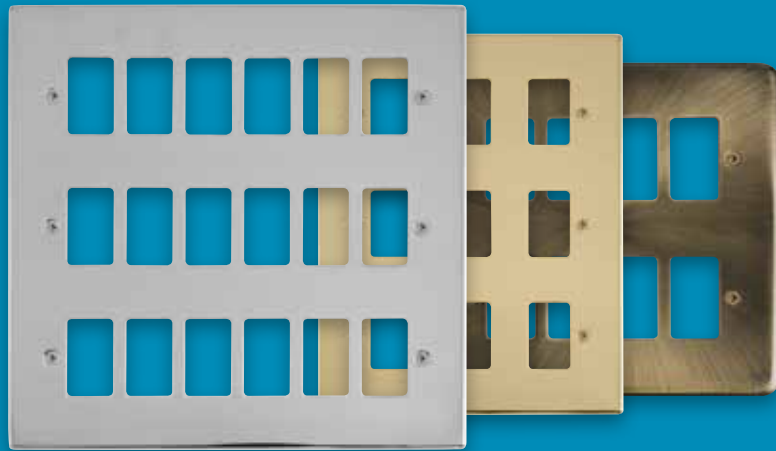

GridPro® puts you in Pole Position

A versatile range of 20A grid products

—

A comprehensive range of finishes and modules available to offer ultimate flexibility. As well as a wide range of modules to choose from all of our switch modules are 20A/20AX rated so they are ideal for both domestic and commercial applications.

The GridPro® range will complement your existing Click® installation, as the range was specifically designed to seamlessly match our existing ranges of Click® wiring accessories.

Ergonomic Modules

GridPro® features design elements that enable quicker and easier installation whilst maintaining all the key features and stylish design of the existing range of Click® wiring accessories.

All modules come with backed off captivated terminal screws for ease of assembly.

A screwdriver guide ensures the screwdriver easily locates with terminal screw head to clamp the cable in position. The terminal screw apertures are designed to help guide the tool.
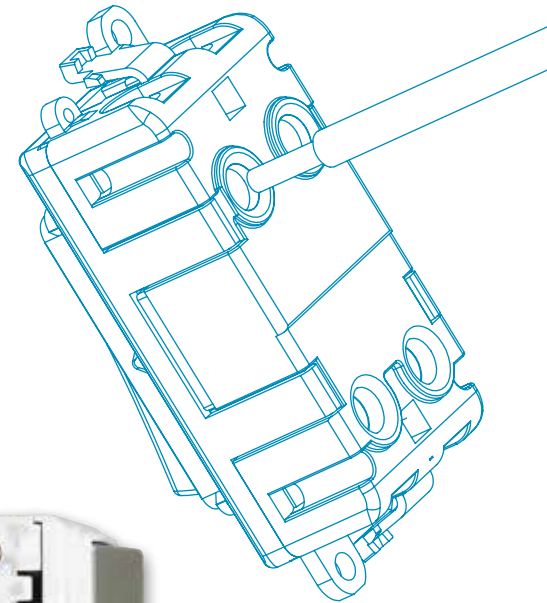

New Grey Modules...

All Grid Pro modules have a clipping and screw attachment on each module.

CLIP-ON MODULES   **SCREW-IN** MODULES
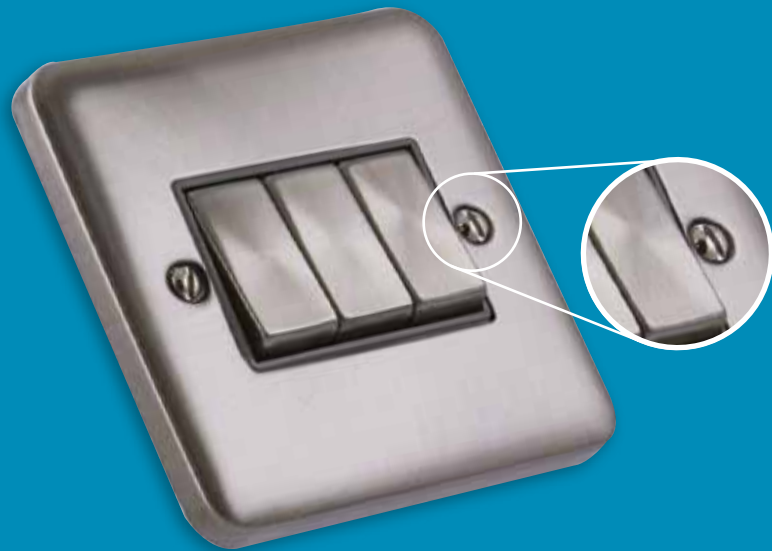

GRIDPRO®

Horizontal Fixing Screws

GridPro® frontplates have horizontal mounted screws to give a uniform, aesthetic look throughout the range.

NO YOKE

STANDARD BACK BOX

Standard BS4662 Back Boxes

A unique feature of 1-4 gang GridPro® frontplates is that any British Standard BS4662 flush mounted back boxes can be used. This is because our 1-4 gang GridPro® frontplates do not require a yoke!*

*excluding the screwless Definity™ GridPro® frontplates, which have their own dedicated inserts.

For use with 1-4 gang GridPro® frontplates...

*excluding the screwless Definity™ GridPro® frontplates, which have their own dedicated inserts.
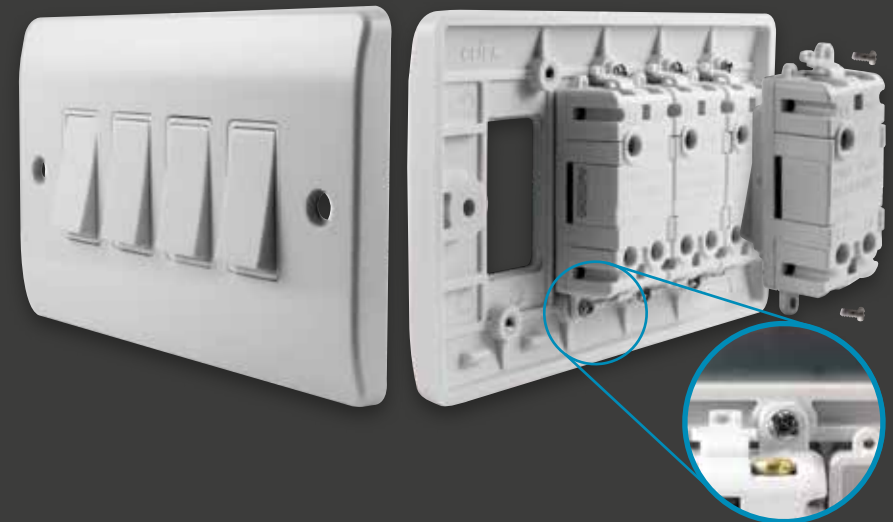

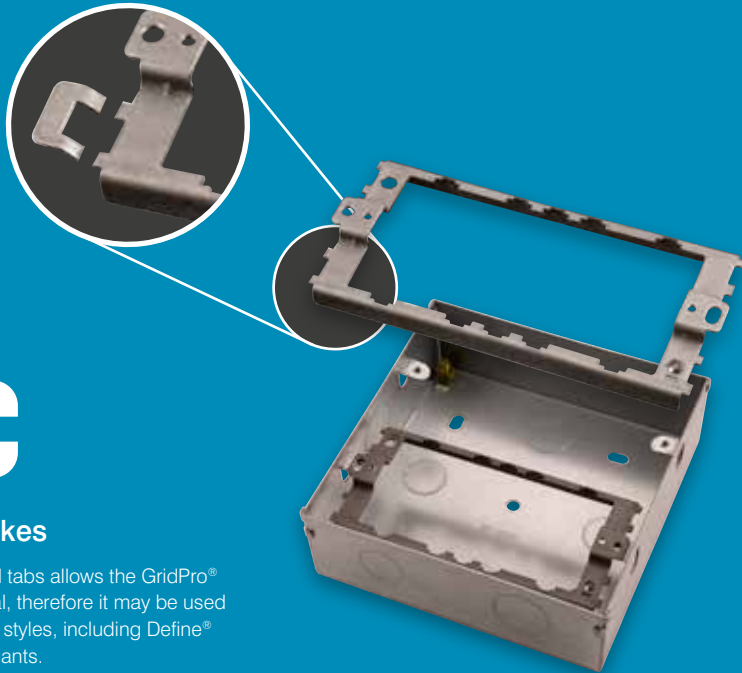

No Yoke!

The GridPro® modules are secured to the back of the 1-4 gang GridPro® frontplates via the screw feature on the modules*. The benefit of not using a yoke is that it allows the installer to use standard back boxes!

NO YOKE

SCREW-IN MODULES

No Yoke!

Screw directly on to the back of 1-4 gang GridPro® frontplates!

SNAP TABS
FITTING INSIDE BACK BOX

Universal Yokes

Removal of the end tabs allows the GridPro®
yoke to be universal, therefore it may be used
for any Click® plate styles, including Define®
and Metal Clad variants.

*excluding the Definity™ GridPro® frontplates,
which have their own dedicated inserts.

**In house laser etching on all
our GridPro® modules!**

CUSTOMISABLE MODULES

CUSTOMISABLE LASER ETCHING

Laser Etching

Let us save you time and money and do
the module etching for you! Completely
customisable modules, offering you and
your customers a wider variety of options.

Contact us for more information.

Clip-on Modules

When a yoke is required on the multi-tier GridPro®
frontplates, the module can be assembled using
the clip attachment which secures them to the
metal yokes.

For use with 6-24 gang GridPro® frontplates*

*excluding the screwless Definity™ GridPro®
frontplates, which have their own dedicated inserts.

All GridPro® modules are available in twelve
distinctive, quality finishes, with black or white
inserts. Antique brass, black nickel and matt black
finishes are available with black inserts only. Brushed
stainless, satin chrome and stainless steel finishes
are available with grey inserts.

Module finishes available: Matt Black **(MB)**,
Antique Brass **(AB)**, Black Nickel **(BN)**,
Pearl Nickel **(PN)**, Polished Brass **(BR)**, Polished
Chrome **(CH)**, Satin Brass **(SB)**, Satin Chrome **(SC)**,

Overload Protection for Ventilation Equipment

—

It has been noted that some manufacturers of ventilation equipment (fans) are not installing internal fuses to protect the equipment. Instead the manufacturers are stating within their installation literature the fan requires overload protection via a 1, 3 or 5 amp fuse.

Regulation 134.1.1 of BS 7671:2018 incorporating amendment No 1:2011 does require electrical equipment to be installed in accordance with the instructions provided by the manufacturers of the equipment.

The Brightest Dimmer you can Fit

—

You'd expect bright ideas from Click®, simply because we talk to contractors. Your problems are our challenges. Our MiniGrid® dimmer module mounting kit fits all MiniGrid® plates, and its nut runner makes installation a breeze.

The dimmer module mounting kit comprise a module mount frame, operating knob and innovative nut runner to facilitate the fixing of the locking nut. Locking nut and washer supplied with the Click® dimmer modules.

• Nut runner means it's easy to fit the locking nut and quick to install (supplied)

• Fits the Click® wiring accessory ranges

• Wide range of wattages available (400W max)

Interchangeable dimmer switch modules:

MD9010	1-10V analogue dimmer module (25 x 62 x 22mm)
MD9001	6A 2 way push on/off (non-dimmable) module (25 x 62 x 22mm)
MD9022	250W/Va 2 way resistive/inductive dimmer module (25 x 62 x 22mm)
MD9042	400W/Va 2 way resistive/inductive dimmer module (25 x 62 x 22mm)

21

MINIGRID®

Eliminate Flickering

Trim the brightness easily with the DIP switch.

Easy to Program

Never loses your installation settings.

Two Dimmers in One

Simply change between leading and trailing edge with DIP switch.

The only Dimmer you'll ever need

—

Suitable for dimming on a conventional 2 way circuit, our new 100W Dual Mode Dimmer with trim function is much easier to program than regular dimmers because of the two small switches on the back of the module. This allows the dimmer to be programmed without removing from the plate.

Small Module Size...

fits into MiniGrid® and GridPro® mouting kits.

• Can be placed above/below each other on multi-tier plates.

• Will fit into 25mm back box when used on raised plates.

• Will fit into 35mm back box when used on flat plates.

• Interchangeable with the MD9022 and MD9042 in our dimmer plates.

Thermal Overload Protection

If the module gets too hot it will cut out without damaging the internal electronics, allowing the module to cool down. This will not reset installation settings.

Leading or Trailing Edge

The installer has the option to select the most effective mode for the situation and lamps being used. This also allows for maximum compatibility.

perfect for commercial applications

Mode's Extended Family

—

Latest additions to the comprehensive Mode® range of accessories are the 12 and 18 gang plates. Utilising the plates and the MiniGrid® modules allows contractors to devise and install customised switching solutions on-site.

Antibacterial & Antiviral Certified Products

All white moulded and Mode® Part M™ wiring accessories are manufactured using Urea Formaldehyde, which has similar inherent properties to antimicrobial additives that inhibit the growth of infectious diseases. All products independently tested achieved a 99.99% kill off rate across all four types of the strains of bacteria - MRSA, E-Coli, Salmonella, Klebsiella Pneumoniae and enveloped viruses.

MINIGRID®

MiniGrid® just got Tougher

—

CL518

The 12 & 18 gang Metal Clad switch plates offer versatility & strengthen the comprehensive selection of Metal Clad products that are already available. Electrophoretically coated plates and back boxes provide a durable and long lasting heavy duty finish to this attractive range of products.

All switch products are of modular construction allowing the installer total freedom in designing customised switching solutions.

*50mm Deep 12 and 18 gang metal clad back boxes are available, providing additional space to accommodate the necessary wiring.

Also available:

1 and 2 gang 13A DP Metal Clad switched socket with outboard neon rockers. Unfurnished plates and mounting boxes are available for use in conjunction with our extensive range of MiniGrid® and New Media™ modules.

CL835   CL840

Switching to us is Key

Hotel key card switches

Our key card switch acts as the main electrical switch for the room and is operated by the guests', reducing the amount of time the lights (and/or appliances) are left on. All lighting and heating facilities only become operational once a corresponding card is inserted into the key card switch, so no needless heating, cooling or lighting of an unoccupied space takes place.

When the key card is removed the controlled circuits remain under power for a further 10 seconds to 5 minutes, which can be adjusted by the hidden potentiometer under the cover plate. This helps ensure a safe exit from the room before the power is turned off.

Compatible with hotels' entry system cards. Suitable for standard cards and credit cards 85.6mm x 53.98mm.

The hotel key card switch comprises of 3 separate products. Providing versatility to compliment any decor or existing Click® wiring installations, with interchangeable mounting and cover plates.

1. Mounting plate

2. Key card timer switch module

3. Finishes to complement all Click® decorative and white moulded ranges

Controlling Lighting Circuits

Suitable for switching inductive loads of 6AX and resistive loads of 10A. Larger loads such as sockets and air conditioning can be connected via contactors. Connection terminals suitable for 2 x 1.5mm² cable.

Call: 01827 63454

ClickSmart⁺

CLiCK ScolmoreGROUP

Making your home smarter

Communicate and connect with your home - anywhere

—

Can you imagine how your home could integrate itself into your daily life? Click Smart+, Scolmore's leading smart home brand, has been created to simplify and streamline your home life via the use of integrated technology.

Click Smart+ boasts an elite range of smart home products. Utilising Zigbee

technology & WIFI to offer smart home solutions to new and existing wiring installations.

The possibilities of Click Smart+ are endless, but the set up – whether with WIFI or with Zigbee – is simple when using our Click Smart+ app.

www.click-smart.com

Email: contractor@scolmore.com

'Tap to Run' Smart Scenes

Tap-to-run also known as 'Scenes' enables you to run multiple devices with a single tap of a button (within the Click Smart+ app). Think of this as one switch for a group of products.

To control your Click Smart+ products through voice control you must have an Amazon Alexa speaker or a Google Home Speaker set up in your home and connected to the Click Smart+ app.

'Automation' Smart Scenes

Automations control your devices automatically when a condition is changed. Automations also allow you to set up timing Schedules for a group or singular smart products.

To control your Click Smart+ products through voice control you must have an Amazon Alexa speaker or a Google Home Speaker set up in your home and connected to the Click Smart+ app.

Smart Power

Control your home anywhere, anytime. A choice of a 1 or 2 gang smart sockets. Allowing you to control the power to each outlet with a smart device or voice control.

Smart Security

Peace of mind away from home with our smart security products. 1080p smart camera, wireless PIR sensor, temperature and window/door sensor.

Smart Receivers

Click Smart+ receivers control your lights and appliances from wherever you are. Simply fit to existing switches or directly at the light source.

GA100

Working Side by Side

The 1+2 dual accessory galvanised steel back boxes (WA370 and WA375) have been designed to allow all Deco®

and Deco Plus® products to be fitted side by side with the supplied gaskets.
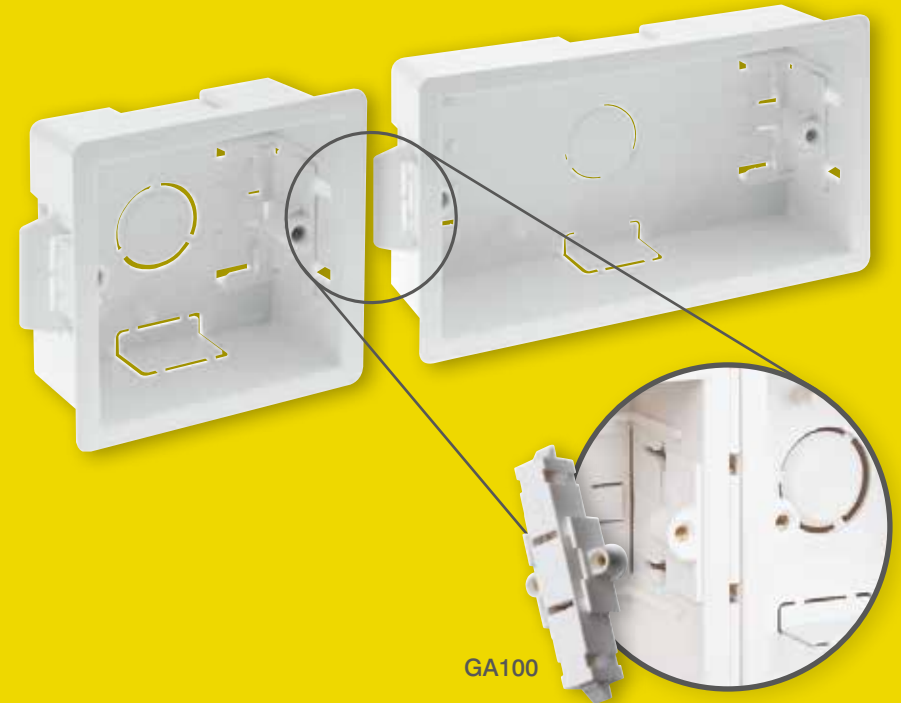

Click together with the Click® Connector

Ezylink (GA100) dry lining wall box connector simply connects most combinations* of Click® dry lining boxes to provide the neatest installation of cavity boxes possible.

*Ezylink **IS** compatible with: WA087P / 088P / 106P / 107P

*Ezylink **IS NOT** suitable for use with WA108P

Click® Website

The Click® website showcases the full range of quality, cost-effective products currently on offer. With regular updates on new products, as well as details of developments within our business.

Having recently updated the site to include links to product and service specific micro sites, we aim to give you access to new information in a timely fashion. You can access these sites via links on the main site or by connecting directly. Either way you can be sure you will always have the latest information at your fingertips.

Online Ordering

The site now incorporates a number of improved features that allow users to access new information directly and easily:

- Ordering 24 hours a day 7 days a week with the ability to check current stock levels as required, meaning you are not restricted to ordering during normal office hours.
- Access to on-line catalogues will keep you fully updated with the complete product range and provide information on new products as and when they become available.
- The order tracking service keeps you up to date with the progress of your shipment.
- Managing your administration paperwork is now even easier with instant access to reports and essential documents at a click of a button.
- A 'quick buy tab' and the ability to store the most common orders for repeated use, adds to the versatility and flexibility of the revised system.
- PDF purchase order uploads now available. You can now take your purchase order directly in PDF format and upload it to automatically extract the data and validate its contents.

Click Scolmore® Product Finder

The Click Scolmore® product finder tool makes it easier than ever for electricians, wholesalers and end users to search and locate products from across all categories, with just a few clicks.

To Register: E-mail us at **sales@scolmore.com** or call our Sales Office on **01827 63454** and one of our Sales Representatives will be more than happy to get you on-line.

Scolmore® Group App

The Scolmore® Group app allows you to use your smart phone to browse our complete range of products, add products to your Favourites or to the Quote Basket and allows you to email the contents of the basket back to yourself.

With Scolmore®, Ovia® Lighting, ESP® & Unicrimp® products available you can use the search facility to easily locate the products required.

Our App also has a useful tool kit featuring:
Quick Quote Calculator, Zs Values, Cables Selection & Voltage Drop, Adiabatic Equation Calculator, Power Factor Calculator, KVA Converter, Lighting Cost Saving Calculator, Lighting No. Calculator and many more...

Marketing Hub

The Marketing Hub is the latest update to the Scolmore® website giving customers the opportunity to enhance their own marketing facilities with very little effort or cost. A selection of templates are available featuring many of our popular products. These templates can be customised with our stockists' details to provide maximum impact and optimise local sales opportunities.

Are you a Click® stockist?

If so, you automatically have access to the Marketing Hub. Download all our latest literature, flyers to personalise and our full range of images for use on your website or artwork. Follow the links from **www.scolmore.com** for more information.

Lighting solutions optimised for performance, energy efficiency and safety...

OVIA®
Lighting

—

Already synonymous with superior performance and innovation following eight years of success as a leading name in the lighting industry, the OVIA® brand of lighting solutions has been further developed to meet the growing opportunities that the transformed lighting industry offers.

Our aim quite simply is to bring to market - on the back of extensive research with customers and contractors - a range of OVIA® lighting products that will provide contractors with the quickest and easiest to install lighting solutions that will save them time and money on a project and that they can source through the reliable wholesale channel.

Today, the comprehensive collection of lighting products from OVIA® will provide solutions for a whole spectrum of projects in a broad variety of sectors, including domestic, commercial, industrial, utility, amenity, emergency lighting and floodlighting. The lighting offer is further enhanced with the inclusion of a full range of lighting control solutions that will optimise energy saving credentials.
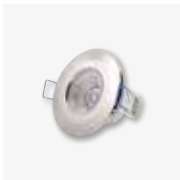

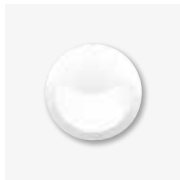

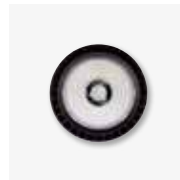

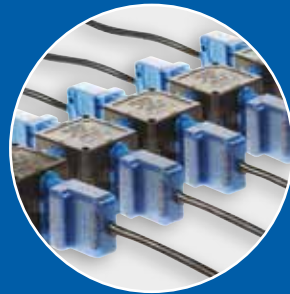

Flow	Domestic	Commercial	Utility		Industrial	Emergency

flow™

CT300

250V 20A 4 pin (1 in 3 out)
Flow™ hub junction box

**Hubs can be linked together in a chain**

The Hub

—

Designed to take the 3 pole or 4 pole plug-in connector versions, giving contractors the flexibility to arrange circuits easily and quickly.

- One hub can be connected directly to another or via the Flow™ link cables

- A quick and easy solution when adding lighting or appliances to an existing Flow™ circuit (can be linked up to 20A)

CT203C

- Quick release lockable covers

- 4 pole plug-in connector with auxiliary terminals

- Fast-fit cable clamps

- Auxiliary provides the opportunity for a second switched live or permanent feed for use typically with emergency lighting applications

OVIA ScolmoreGROUP

Connectors, Hubs & Management Boxes

The lighting management system is a new range of additional products to the existing Flow™ range and has been designed specifically to help contractors create more complex lighting installations quickly, easily and safely. It features a number of new products that allow the quick connection, configuration and re-configuration of circuits, primarily intended for lighting.

Key Features of the Lighting Management Boxes:

- Suitable for loads up to 20A which means it can be used for more than just lighting
- Management boxes can be controlled or dimmed using suitable PIR sensors or mains dimmers
- Can incorporate wireless switching and dimming scenarios using Click® Smart products
- Durable heavy duty finish to withstand all installation requirements
- Ample fixing points to suit any method of installation
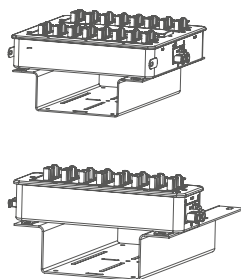

CT1016

Use the CT1016 to take control of up to 16 lights (24 using the CT350), with three different switching configurations. Easily add a switched live into a Flow™ circuit.

- 16 way configurable box
- 1 x 16 way (1 way switching)
- 1 x 16 way (2 way switching)
- 2 x 8 way (1 way switching)
- Additional 8 ways available using CT350 splitter
- Additional way allows interlinking
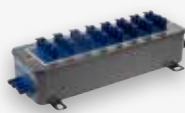

CT1008

With the CT1008 you can connect up to 8 lights (16 using the CT350), or you can connect another CT1008 to the output at the end.

- 8 way box
- Connect up to 8 lights (16 using the CT350)
- Additional output allows interlinking or provides additional way

CT2300

Plug-in switch adapter easily adds a switched live into a Flow™ circuit.

- Pre-wired with earth and neutral links
- 250V~20A plug-in connector
- Large terminals with easy access
- Terminal screws supplied raised
- Easy lock and release mechanism
- Versatile, easy-connection system

Inceptor® Nano5

4.8W Fire-Rated LED Downlight

—

The Inceptor Nano5 consumes less power and produces a comparable light output while reducing the size & cost. With a highly competitive price point for the features and benefits

offered, the new high-performance, 4.8W LED lighting products are designed to have mass market appeal and are suitable for a variety of uses in domestic applications.

Features & Benefits...

3YR		**4000K 2700K**		
3 Year Warranty	40° Beam Angle	Cool White & Warm White	30, 60 and 90 Minute Fire-Rating	Dimmable as Standard

Integrated Flow™ Connector

An integrated 3 Pole Flow™ connector allows for quick and simple connection & disconnection for initial and periodic testing to be carried out.

Insulation Support Bracket

Sold Separately - the removable Insulation Support Bracket has been developed to allow installers to lay thermal insulation directly over the top of the Inceptor® Nano5. Creating a 20mm air-space above the driver allows air to circulate and cool, therefore the driver dissipates heat more effectively and in-turn lets the luminaire run cooler.

MAGDUO

ESP ●●●●● ScolmoreGROUP

Fire Panels

2, 4 and 8 Zone Two Wire Fire Panels

—

Two-Wire fire alarm systems are based on standard conventional system technology. Unlike standard conventional four wired systems where the detectors, call points and alarm devices for each zone are wired on separate circuits, MAGDUO utilises intelligent Two-Wire technology, which allows all devices to be wired on the same set of two-core zone cables back to the control panel - enabling it to

use a single circuit per zone both for detection and to power the sounders. This advanced technology can reduce both installation and material costs. With its adaptability, speed of installation and cost-effectiveness, MAGDUO provides an ideal fire alarm solution for a range of small to medium sized projects such as restaurants, retail outlets, schools, offices, apartments and hotels.

Fire System Devices

Conventional & Addressable Fire Alarm Systems

—

MAGfire offers a comprehensive product line up that is fully compliant with the very latest Construction Products Regulation. The MAGfire range covers conventional, or four-wire, fire alarm systems which have been traditionally used in smaller properties such as shops and restaurants, as well as addressable systems which are suitable for large commercial premises and more complex networked systems.

Conventional System Cabling

Sounder Circuit

Zone 1

Detector Circuit

Zone 2
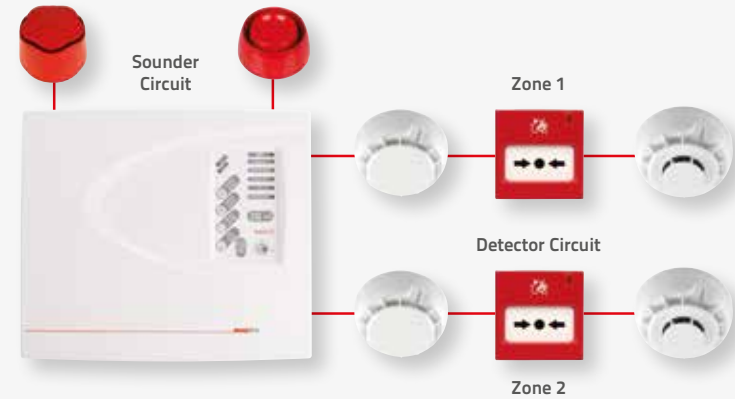

- Detectors and Call Points are wired onto circuits known as the Zone Circuits

- Sounders and Strobes are wired on a separate circuit known as the Sounder Circuits

- In an event of a fire, the fire alarm panel will indicate which Zone has been activated.

Addressable System Cabling

Zone 1/2

- Detectors, Call Points and Sounders are wired onto the same circuit known as the Loop Circuit (Ring Main)

- In an event of a fire, the fire alarm panel will indicate exactly which Device has been activated.

SANGAMO

Time switches and heating controls...

Sangamo

—

Founded in 1921 and proudly manufactured in the UK, Sangamo is recognised as one of the world's leading design and manufacturers of a wide range of electrical measuring and control equipment.

The experienced UK production team at Sangamo, located in Port Glasgow, have been manufacturing time switches in the UK for over 65 years.

Sangamo joined the Scolmore® Group of companies in 2018. The additional expertise, knowledge and support of the Scolmore® Group has strengthened and continued their ability to offer a wide range of time switches and heating controls for domestic, commercial and industrial use.

With an unrivalled reputation for quality and reliability, they have built strong relationships with the UK and Ireland's major electrical wholesalers.

At Sangamo the customer service and technical support teams are knowledgeable and experienced, meaning they can confidently offer tailored solutions to companies and organisations, providing customised products to meet the needs of every single customer.

Round Pattern Time Switches

DIN & Panel Time Switches

SANGAMO

Round Pattern Time Switches

The Sangamo Round Pattern Time Switch (or RPTS) is well known for its quality and reliability. All models can switch up to 20A and are fully manufactured in the UK.

The longevity of these timers is legendary, a recent survey found many lasting three, four and even five decades. Many outlasted their original purpose and were reinstalled a second or third time.

UNICRIMP®

A comprehensive range of cable accessories...

—

Established as a new business by the Scolmore® Group in 2015, Unicrimp® brings to the electrical contracting industry a comprehensive range of cable accessory products.

All products within the Qcrimp® range are manufactured under stringent quality control systems and are fully compliant with the very latest industry regulations.

Available exclusively through the electrical wholesale trade and marketed under Q-Crimp, the range includes cable ties, crimp terminals, PVC tape, copper tube terminals, cable clips, and brass and nylon glands. In addition, the Q-Fire range of fire-rated products provides installers with solutions that will help satisfy the latest IET wiring Regulations. Providing everything required to harness cable between the consumer unit and the end accessory.

Aligned with the core values of the Scolmore® Group of companies, Unicrimp® offers the same levels of outstanding customer service, high quality products and commitment to new product development.

Situated close to the Group Headquarters in the Midlands, the Unicrimp® distribution centre is ideally located to supply to all areas of the UK.
